Ms. Marlene H. Dortch
Secretary
Federal Communications Commission
445 12th Street, SW
Washington, DC 20554

Re: *In the Matter of Numbering Policies for Modern Communications, WC Docket No. 13-97, IP-Enabled Services, WC Docket No. 04-36, Telephone Number Requirements for IP-Enabled Services Providers, WC Docket No. 07-243, Telephone Number Portability, CC Docket No. 95-116, Developing a Unified Inter-carrier Compensation Regime, CC Docket No. 01-92, Connect America Fund, WC Docket No. 10-90, Numbering Resource Optimization, CC Docket No. 99-200*

Dear Ms. Dortch:

Pursuant to the *Notice of Proposed Rulemaking, Order, and Notice of Inquiry* issued in the above captioned proceedings on April 18, 2013 ("*Numbering Order*"), IntelPeer hereby submits its Initial Report on its numbering trial.

IntelPeer applied for an OCN under the "IPES" category on July 16, 2013 and was granted its new OCN of 178H on July 22, 2013 by NECA.

IntelPeer filed its initial request with the North American Numbering Plan Administrator for a 10,000 block to establish an LRN in LATA 730 (Los Angeles) on September 6, 2013. Consistent with its *Numbering Trial Proposal*, IntelPeer returned nine 1,000 blocks from the 10,000 block in LATA 730, and its understanding is that those numbers will be returned to the pool the day after the effective date of the LRNs.

The LRN and number block for Los Angeles market becomes effective across the industry on November 27th. IntelPeer has begun operational testing with internal telephone numbers to assess call routing. IntelPeer expects to start provisioning new customers using IntelPeer OCN designated numbers and begin transitioning existing customer telephone numbers to the IntelPeer OCN after the effective date in LERG, November 27, 2013.

Because this initial report is dated prior to the effective dates of the telephone numbers and LRNs, IntelPeer has nothing to report for the specific reporting categories identified by the Commission in the *Numbering Order*, which includes:

1. Total new numbers placed in service by IntelPeer;
2. IntelPeer's total number of port-in requests (including existing IntelPeer customers as well as newly won customers); Percentage of successful port-in;
3. Number of requests to port-out from IntelPeer for directly held numbers and the percentage of successful port outs;
4. Total number of routing failures, along with the cause of those failures; and
5. Description of any billing or compensation disputes.

Please do not hesitate to contact me with any further questions or concerns.

Sincerely,

A handwritten signature in black ink, reading "Kristin Manwarren". The signature is written in a cursive, flowing style.

Kristin Manwarren
Counsel for IntelPeer, Inc.
